Set-up business central APP365 extensions

EXPORT INVOICES PDF
The PDF files/documents of invoices are saved in your container

EXPORT ORDERS PDF
The PDF files/documents of sales orders are saved in your container

Why export PDF to Cloud?

Either mobile or web apps often need to access invoices and orders PDF.
B2B, B2C, Sales Force applications may need to show those documents exactly as they are generated from Business Central.
This extension makes this operation quicker, safer and easier: in a single click it allows to export those documents.

EXPORT INVOICES & ORDERS PDF
APP365

MOBILE APPS
Your Sales Force mobile app quickly and securely shows or downloads the PDF.

WEB APPS
Either your B2B or B2C website quickly and securely shows or downloads the PDF.

SAFE AND QUICK
Neither security issues nor stress for your Business Central API.

EXPORT
INVOICE & ORDER'S PDF
TO AZURE STORAGE
APP365

BC AVAILABILITY PRESERVED

API USAGE PRESERVED
Business Central SaaS offers a maximum of 600

requests per minute.

Don't waste your API calls just to generate a PDF.

EXPORT INVOICES & ORDERS PDF
APP 365

FASTER AND MORE SECURE

NO LICENSE EXPOSED

To download a PDF from a cloud repository is pretty much faster then to generate from your ERP. Moreover, if you plan your mobile or webapp to directly download it from Business Central you need to expose to your external application a specific username (with its license) and either its webkey or its credential.

License costs saved
You don't need to pay for a license cost for external apps.

User data not exposed
You don't need to give to third parties or to embed in external apps any user credentials.

Quick and secure
Your Business Central is not exposed at all and cloud repos are faster than BC.
